Chemistry, 4th ed., gives students the tools to build an understanding of atomic structure, chemical composition, and chemical reactions. Throughout the course, students will put these tools to work in different fields of chemistry in ways that can show them the impact that chemistry can have to help people and to wisely use God's world to glorify Him. This new edition features new content about semiconductors and nuclear chemistry as well as additional biblical worldview-shaping sections that help

students to think through common debates among scientists. - Publisher.

Science 5 Student Text, 4th ed. helps the student develop a biblical worldview as it relates to science concepts. The course focuses on minerals and rocks, fossils, matter and heat, sound and light, weather, biomes, ecosystems, and the respiratory and circulatory systems. Throughout the course, the student will have opportunities to develop his science process skills as he participates in hands-on activities and projects. The student will also learn how to view science from a biblical perspective through the worldview-shaping lesson from Answers in Genesis that is included with each chapter. - Publisher.

Physical Science (4th ed.) is an exciting and engaging introduction to the world of physics and chemistry. Designed and written for 9th graders, it provides the necessary foundation of knowledge and theory for subsequent science courses, including Biology, Chemistry, and Physics. This textbook also shows that true science involves glorifying God and serving our fellow humans in some capacity. Through practical Bible integration, students learn that a Christian worldview permeates true science. The textbook does not assume any prior knowledge in physics or chemistry, other than normal life experiences. It erects a scaffold of basic information regarding matter and measurement early in the text; then builds on that beginning the essential information in classical physics, work and energy,

A dinosaur book like no other, this irreverent chronicle of science and pseudoscience takes the reader on a journey through numerous bizarre ideas about ancient reptiles. Were dragon legends inspired by human encounters with fire-breathing dinosaurs? Do the Bible and other ancient works of literature and art depict dinosaurs? Astoundingly, those and other strange notions have infiltrated grade-school science textbooks. This exposé unmasks the errors that underlie such notions and

# Access Free Bob Jones Biology 4th Edition

reveals the science that flattens them, while treating readers to explanations of rocket fuel, nuclear power plants, the electric eel's shocking capabilities, and how the young-Earth creationist position contradicts the very scripture that it strives to uphold. Finding humor in absurdity, the book shows fans of science, religious studies, folklore, and fire that young-Earth creationist dinosaur pseudoscience is deeply comic once one gets to know it properly.
