Alfredo, a choir boy in 18th-century Italy, loses his family in a fire, and his mysterious Uncle Giorgio spirits him away to their ancestral home below a volcano. There he learns that Uncle Giorgio is the Master of the Mountain; he can control the volcano. He is also an alchemist, able to make gold from the tears of the fiery salamander he captured from the heart of the mountain. Alfredo is his heir, the next Master; and as Alfredo learns the history of his family and its power, he begins to suspect that his uncle is actually a fearsome sorcerer.

"The first biography of Carpenter, Skyscraper Lullaby balances the composer's complex personal and musical likes. Howard Pollack considers all of Carpenter's works, tracing the evolution of his technique and style. Carpenter studied composition with John Knowles Paine at Harvard and Edward Elgar in Rome, but his greatest influence was the Chicago theorist Bernhard Ziehn, one of the most progressive figures in early twentieth-century music. Carpenter became known for incorporating the contributions of various literal artists in his works."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . Stark is a secret consortium with more money than God, and the social conscience of a dog on a croquet lawn. What's more, it knows the Earth is dying. Deep in Western Australia where the Aboriginals used to milk the trees, a planet-sized plot is taking shape. Some green freaks pick up the scent: a pommie poseur; a brain-fried Vietnam vet; Aboriginals who have lost their land...not much against a conspiracy that controls society. But EcoAction isn't in society: it just lives in the same place, along with the cockroaches. If you're facing the richest and most disgusting scheme in history, you have to do more than stick up two fingers and say 'peace'.

Katie ' s Cabbage is the inspirational true story of how Katie Stagliano, a third grader from Summerville, South Carolina, grew a forty-pound cabbage in her backyard and donated it to help feed 275 people at a local soup kitchen. In her own words, Katie shares the story of the little cabbage seedling and the big ideas of generosity and service that motivated her to turn this experience into Katie ' s Krops, a national youth movement aimed at ending hunger one vegetable garden at a time. Katie ' s Cabbage reminds us of how small things can grow and thrive when nurtured with tender loving and care and of how one person, with the support of family, friends, and community, can help make a powerful difference in the lives of so many. Katie ' s Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library and Information Science. Patricia Moore-Pastides, First Lady of the University of South Carolina and author of Greek Revival from the Garden: Growing and Cooking for Life, offers a foreword about her friendship with Katie and her admiration of Katie ' s dream to end hunger one garden at a time.

Comparative Ocean Governance examines the world's attempts to improve ocean governance through place-based management—marine protected areas, ocean zoning, marine spatial planning—and evaluates this growing trend in light of the advent of climate change and its impacts on the seas. This monograph opens with an explanation of the economics of the oceans and their value to the global environment and the earth's population, the long-term stressors that have impacted oceans, and the new threats to ocean sustainability that climate change poses. It then examines the international framework for ocean management and coastal nations' increasing adoption of place-based governance regimes. The final section explores how these place-based management regimes intersect with climate change adaptation efforts, either accidentally or intentionally. It then offers suggestions for making place-based marine management even more flexible and responsive for the future. Environmental law scholars, legislators and policymakers, marine scientists, and all those concerned for the welfare of the world's oceans will find this book of great value.
