Introduction to Managerial Accounting, 4/e by Brewer/Garrison/Noreen is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. However, this is not simply a briefer book with chapters removed; B/G/N has been rethought and retooled to meet the needs of the market. B/G/N 4/e is a more accessible, yet thoroughly student-friendly text that satisfies the basic needs of the managerial accounting student without unnecessary depth on advanced topics associated with the follow-up course: cost accounting/cost management. Faculty and students alike will find this new edition has retained the hallmark features of the Garrison brand: author-written supplements, excellent readability, terrific examples, and balanced end-of-chapter material.

A less-expensive grayscale paperback version is available. Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Introduce students to the essentials of cost accounting using the clear, concise and practical approach in PRINCIPLES OF COST ACCOUNTING, 17E. The book's unique 10-chapter format provides a thorough understanding of cost concepts, cost behavior, and cost accounting techniques as applied to manufacturing and service businesses. The authors ensure students master fundamentals before progressing to more complex topics. Students begin with job order costing, and advance to process costing before delving into specialized topics, such as budgeting, standard costing and variance analysis, costing for service businesses, and cost analysis for management decisions. The book introduces concepts in small, manageable sections that are immediately reinforced with proven questions, demonstration problems, exercises, and self-study quizzes. Updated examples and current data keep the content relevant to todays times. Students learn how to determine the costs of products and services and set selling prices. Students also discover how to bid on products and analyze the relative profitability of products and services. In addition, the book teaches how to measure the performance of managers, design an accounting system, and use accounting to further organizational goals. Count on PRINCIPLES OF COST ACCOUNTING, 17E for the most logical, relevant approach to your cost accounting course. The emphasis of MANAGERIAL ACCOUNTING, 6e is on teaching students to use accounting information to best manage an organization. In a practice Hilton pioneered in the first edition, each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. Known for balanced examples of Service, Retail, Nonprofit and Manufacturing companies, Hilton offers a clear, engaging writing style that has been praised by instructors and students alike. As in previous editions, there is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting and performance evaluation.
