Dinosaurs and All That Rubbish by Michael Foreman This is a great thought provoking story which can be enjoyed by children of all ages. The pictures are colourful, bright and friendly. Although published in 1972 the message of pollution and the importance of recycling remains the same and is probably even more relevant today.

A newfound feathered dinosaur sported fuzz and weird rods on its shoulders The chicken-sized carnivore is the first feathered dino fossil found in the Southern Hemisphere

After humans leave the barren Earth for a distant star, the dinosaurs come back to life and tidy up the mess that the humans have left behind. The dinosaurs will only then allow the humans to come back to Earth once they have agreed that the planet should be shared and enjoyed by everyone.

Based on the best-selling book by Michael Foreman, Dinosaurs and All That Rubbish is an ever-topical musical play for young people, with an environmental theme. Man destroys his own world through misuse and disrespect, only to search for a replacement in the stars. In his absence, the Dinosaurs return to Earth to discover desolation and destruction. In this humorous and intelligent story, the dancing Dinosaurs restore the Earth to its former beauty, with the help of the Animal Kingdom. Ironically, when Man returns, he tries to lay claim to the new, blooming planet he has discovered; but he is reminded that this is the same decaying Earth he had ruined and abandoned.

They're stomping and stamping all over the place. Children will love finding out why in this classic environmental tale.

A tiny dinosaur is born to a family of rather huge dinosaurs and everyone is mystified about why it is so different. As the littlest dinosaur grows, it feels left out and at odds with the world of its huge family, until one day its very size is the thing that rescues them all. A charming tale featuring every toddler's favourite - dinosaurs - with a sweetly told message about being happy being yourself. Brilliantly read by Claire Skinner. Please note that audio is not supported by all devices, please consult your user manual for confirmation.

After ruining Earth and soaring off to a star in his rocket, the man returns to find that ancient creatures have beautified the earth and it is where he wants to live after all.

100-Year Cover-up Revealed: We Lived With Dinosaurs makes our past coexistence with dinosaurs effortlessly apparent with a wide variety of proof ranging from artistic to documentary to scientific. Although it automatically invalidates evolution by proving coexistence, this book takes the extra step of examining and destroying, with logic and science, every major assumption and claim made by evolutionists, including the absurd notion that dinosaurs and humans missed each other by 65 million years. The sub-topic that runs throughout the entire book is that, for the past century, evolutionists have been brainwashing us with bogus claims while actively and passively covering up evidence showing that humans coexisted with dinosaurs and that evolution is basically a hoax. 100-Year Cover-up Revealed: We Lived With Dinosaurs not only proves the reality of coexistence and the fallacy of evolution, but also shows how the suppression of these facts has polluted our laboratories, classrooms, and media. Finally, this book highlights the scientific and educational implications of its conclusions and offers an intelligent alternative to evolution.

Ever since Jurassic Park we thought we knew how dinosaurs lived their lives. In this remarkable new book, Brian J. Ford reveals that dinosaurs were, in fact, profoundly different from what we believe, and their environment was unlike anything we have previously thought.
