"Peoples of the Sea" is, in some sense, the culmination of the series "Ages in Chaos." In this volume the erroneous time shift of classical history reaches its maximum span - 800 years! With carefully documented evidence and indisputable arguments, Velikovsky places Ramses III firmly into the 4th century B.C. thereby solving, once and for all, numerous conundrums that historians had been confronted with in the past. He unveils the surprising identity of the so-called "Peoples of the Sea," clarifies the role of the Philistines and solves the enigma of the Dynasty of Priests. This volume leads Velikovsky's revised chronology up to the time of Alexander where it links-up with the records of classical chronology. In an extensive supplement Velikovsky delves into the fundamental question of how such a dramatic shift in chronology could have come about. Analyzing the main pillars of Egyptian chronology, he points out where the most dramatic mistakes were made and addresses the misunderstanding underlying the "astronomical chronology." In a further supplement he discusses the very interesting conclusions that can be drawn from radiocarbon testing on Egyptian (archeological) finds.

Presents conclusive evidence that ancient Egypt was originally the remnant of an earlier, highly sophisticated civilization • Supports earlier speculations based on myth and esoteric sources with scientific proof from the fields of genetics, engineering, and geology • Provides further proof of the connection between the Mayans and ancient Egyptians • Links the mystery of Cro-Magnon man to the rise and fall of this ancient civilization In the late nineteenth century, French explorer Augustus Le Plongeon, after years of research in Mexico's Yucatán Peninsula, concluded that the Mayan and Egyptian civilizations were related--as remnants of a once greater and highly sophisticated culture. The discoveries of modern researchers over the last two decades now support this once derided speculation with evidence revealing that the Sphinx is thousands of years older than Egyptologists have claimed, that the pyramids were not tombs but geomechanical power plants, and that the megaliths of the Nabta Playa reveal complex astronomical star maps that existed 4,000 years before conventional historians deemed such knowledge possible. Much of the past support for prehistoric civilization has relied on esoteric traditions and mythic narrative. Using hard scientific evidence from the fields of archaeology, genetics, engineering, and geology, as well as sacred and religious texts, Malkowski shows that these mythic narratives are based on actual events and that a highly sophisticated civilization did once exist prior to those of Egypt and Sumer. Tying its cataclysmic fall to the mysterious disappearance of Cro-Magnon culture, *Before the Pharaohs* offers a compelling new view of humanity's past.

The University Museum excavated at Beth Shan from 1921-1934, when stratigraphical methods were first being developed. For this study the two Late Bronze levels (VII and VIII) have been reevaluated by the careful analysis of field records, photographs, and drawings along with the restudy of all artifacts housed in The University Museum and a selection of objects in the Rockefeller Museum in Jerusalem. The structures of these levels have parallels in New Kingdom Egypt and Late Bronze/Early Iron Age sites of southern Levant and the Sinai. Included are contributions by 13 specialists on specific classes of objects and technologies. University Museum Monograph, 85
