Study & Master Physical Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences.

Study & Master Physical Sciences Grade 11 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences. The comprehensive Learner's Book: [explains key concepts and scientific terms in accessible language and provides learners with a glossary of scientific terminology to aid understanding.](#) [provides for frequent consolidation in the Summative assessments at the end of each module](#) [includes case studies that link science to real-life situations and present balanced views on sensitive issues](#) [includes 'Did you know?' features providing interesting additional information](#) [highlights examples, laws and formulae in boxes for easy reference.](#)

Education is vital to the progression and sustainability of society. By developing effective learning programs, this creates numerous impacts and benefits for future generations to come. K-12 STEM Education: Breakthroughs in Research and Practice is a pivotal source of academic material on the latest trends, techniques, technological tools, and scholarly perspectives on STEM education in K-12 learning environments. Including a range of pertinent topics such as instructional design, online learning, and educational technologies, this book is an ideal reference source for teachers, teacher educators, professionals, students, researchers, and practitioners interested in the latest developments in K-12 STEM education.

Blended learning has gained significant attention recently by educational leaders, practitioners, and researchers. iFlex, a variation of blended learning, is based on the premise that certain non-interactive teaching activities, such as lecturing, can take place by students without teachers' direct involvement. Classroom time can then be used for educational activities that fully exploit teacher-student and student-student interactions, allowing for meaningful personalized feedback and scaffolding on demand. Revolutionizing K-12 Blended Learning through the iFlex Classroom Model presents a well-rounded discussion on the iFlex model, highlighting methods for K-12 course design, delivery, and evaluation in addition to teacher performance assessment in a blended iFlex environment. Emphasizing new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, and educational technology developers.
