Appropriate for one-semester courses in Administrative Law at both college and university levels. Legal concepts and Canadian business applications are introduced in a concise, one-semester format. The text is structured so that five chapters on contracts form the nucleus of the course, and the balance provides stand-alone sections that the instructor may choose to cover in any order. We've made the design more reader-friendly, using a visually-appealing four-colour format and enlivening the solid text with case snippets and extracts. The result is a book that maintains the strong legal content of previous editions while introducing more real-life examples of business law in practice.

The key words for this text are: "clear, concise and relevant". Most students taking this course are not going to be lawyers and therefore the emphasis is on a strong business orientation. Key features and competitive advantages include additional core topics such as risk management, negligence, and intellectual property. Case material has also been integrated into each chapter to illustrate the key topics and is presented in summary format as well as in hypothetical examples. Numerous features within the text demonstrate business law to students in a real world context. This text will assist and guide the entrepreneurial student who is aiming to start a business and needs the legal knowledge to avoid pitfalls.
