Liner Shipping 2025 The liner shipping industry undergo a dramatic transformation in the coming decade. The new book - "Liner Shipping in 2025 - How to Survive and Thrive" outline the underlying trends driving this development, and explores the critical questions industry stakeholders need to ask if they want to be on the forefront of this change.

# Download Ebook Liner Shipping 2025 How To Survive And Thrive

Global Liner Shipping is undergoing the largest transformation since the invention of the container itself. The core business models and business cultures which made the shipping lines successful are now failing. The coming decade will see the emergence of new business models suited for a new environment. This transformation is a source of significant opportunity for industry stakeholders, but equally a source of grave risk should existing companies fail to adapt accordingly. This book provides a foundation for industry stakeholders to understand the trends impacting the industry, allowing them to identify the right questions to ask in order to not only survive, but thrive towards 2025.

Culture shock in Maersk Line is the first detailed description of the significant cultural changes which have taken place in one of Denmark's most iconic companies over the past 15 years ... It has been a turbulent period, where old virtues have been replaced, and the old anarchistic entrepreneurs have been replaced by a modern and professional focus on hard results ... As Maersk employees who participated in the book acknowledge: "Maersk Line today, and Maersk Line 10 years ago, have only two things in common: They ship containers, and they are headquartered on Esplanaden in Copenhagen. Everything else has changed."--From back cover.

This series contains the decisions of the Court in both the English and French texts.

Globalisation and the rapid increase in world trade in the past decade have contributed to greater demand for international transport and logistics and, consequently, the expansion of the maritime industry. The dramatic changes in the mode of world trade and cargo transportation make it more important than ever to have a clear understanding of the way in which freight is transported by sea and the role of ports in this exchange. At the cutting edge in its assessment of the industry, *Maritime Logistics* covers the whole scope of maritime logistics and examines latest logistical developments within the port and shipping industry. With a range of new international contributors, this new edition has been thoroughly revised and updated. There are new chapters on port centric logistics, hinterland logistics and global supply chains, maritime transport and logistics as a trade facilitator, and future trends and developments. Written by a team of international experts with over fifty years' experience in the field, *Maritime Logistics* provides a truly global perspective. The book covers everything that students of logistics, as well as those working within the industry, need to know about maritime logistics, including shipping lines, containers, tankers, dry bulk, port-centric logistics, and much more. The book includes contributions from leading practitioners and academics in the field. The new edition includes a variety of new contributors, including: A. Michael Knemeyer, Associate Professor of Logistics, Fisher College of

Business, The Ohio State University; John P. Saldanha, Assistant Professor of Logistics, Fisher College of Business, The Ohio State University; Prof. Dr. Michele Acciaro, Assistant Professor of Maritime Logistics, THE KLU, Hamburg; Prof. Dr. Joern Meissner, Professor of Supply Chain Management & Pricing Strategy, THE KLU, Hamburg.

Innovations are dramatically changing the traditionally conservative global ocean shipping industry as it works to become more efficient and more sustainable. Academic and former shipping company owner Peter Lorange is best placed to make sense of how to approach and keep ahead of these changes. This book explains what the key innovations are, how to ensure a return on investment, the barriers to innovation and how to overcome them. Drawing on a number of specialist case studies, Lorange outlines the specific analytical and decision-making steps to consider and actions to take to arrive at a new strategic blueprint for modern shipping companies. This book is invaluable for practising shipping company executives, advanced students of shipping, logistics, port management and maritime economics and investors deciding whether to invest in a particular shipping firm.

This report examines the issues that need to be considered before the decision to proceed to costly expansions with long-life spans and a structural influence on the local and national economy. The report benefits from a case study of Chile.

The Review of Maritime Transport is an UNCTAD flagship publication, published annually since 1968 with 2018 marking the 50 year anniversary. Around 80 per cent of the volume of international trade in goods is carried by sea, and the percentage is even higher for most developing countries. The Review of Maritime Transport provides an analysis of structural and cyclical changes affecting seaborne trade, ports and shipping, as well as an extensive collection of statistical information.

Port Development and Competition in East and Southern Africa analyzes the 15 main ports in East and Southern Africa (ESA) to assess whether their proposed capacity enhancements are justified by current and projected demand; whether the current port management approaches sufficiently address not only the maritime capacity needs but also other impediments to port efficiency; and what the expected hierarchy of ports in the region will be in the future. The analysis confirms the need to increase maritime capacity, as the overall container demand in the ports in scope is predicted to begin exceeding total current capacity by between 2025 and 2030, while gaps in terms of dry and liquid bulk handling are expected even sooner. However, in the case of many of the ports, the issue of landside access—the ports' intermodal connectivity, the ease of international border crossing, and the port-city interface—is more important than the need to improve maritime access and capacity. The analysis finds that there is a need to

## Download Ebook Liner Shipping 2025 How To Survive And Thrive

improve the operating efficiency in all of the ESA ports, as they are currently less than half as productive as the most efficient ports in the matched data set of similar ports across the world, in terms of efficiency in container-handling operations. Similarly, there is a need to improve and formalize stakeholder engagement in many of the ports, to introduce modern management systems, and to strengthen the institutional framework to ensure the most efficient use of the infrastructure and to be able to attract private capital and specialist terminal operators. Finally, given the ports' geographic location and proximity to main shipping routes, available draft, and the ongoing port-and-hinterland development, the book concludes that Durban and Djibouti are the most likely to emerge as the regional hubs in ESA's future hub-and-spoke system.

Infrastructure Investment in Indonesia: A Focus on Ports presents an important and original collation of current material investigating the efficient facilitation of major infrastructure projects in Indonesia and Australia, with an emphasis on infrastructure investment and a focus on port planning and development. This interdisciplinary collection—spanning the disciplines of engineering, law and planning—draws helpfully on a range of practical and theoretical perspectives. It is the collaborative effort of leading experts in the fields of infrastructure project initiation and financing, and is based on international research conducted by the University of Melbourne, Universitas Indonesia and Universitas Gadjah Mada. The volume opens with a macroscopic perspective, outlining the broader economic

## Download Ebook Liner Shipping 2025 How To Survive And Thrive

situations confronting Indonesia and Australia, before adopting a more microscopic perspective to closely examine the issues surrounding major infrastructure investment in both countries. Detailed case studies are provided, key challenges are identified, and evidence-based solutions are offered. These solutions respond to such topical issues as how to overcome delays in infrastructure project initiation; how to enhance project decision-making for the selection and evaluation of projects; how to improve overall efficiency in the arrangement of project finance and governance; and how to increase the return provided by investment in infrastructure. Special focus is given to proposed improvements to the port cities of Indonesia in the areas of major infrastructure project governance, policies, engagement, operation and processes. By rigorously investigating the economic, transport, finance and policy aspects of infrastructure investment, this book will be a valuable resource for policy makers and government officials in Indonesia and Australia, infrastructure investment organisations, and companies involved in exporting services between Indonesia and Australia. This book will also be of interest to researchers and students of infrastructure planning and financing, setting a solid foundation for subsequent investigations of financing options for large-scale infrastructure developments.

Praise for *Magician's Choice* "In the future of *Magician's Choice*, magic has displaced science, but magic takes as much rigor to operate as technology ever did. Stefon Mears weaves an entertaining space opera out of tuning forks, duels,

and dragon familiars. The result is an impressive debut novel." – Bruce Holland Rogers Author of The Keyhole Opera About Magician's Choice Academic wizard Donal Cuthbert thought courier work would be easy money. But after someone tries to blow him up, Donal must navigate a web of lies, murders, and corporate espionage, including a beautiful liaison who might be his ally ... or his greatest enemy. Helioship captain John Jacobs faces financial ruin unless this Mars-Earth run goes perfectly. But squabbling crew members, threats from deep space, and a passenger complement full of conspiracies might destroy his ship en route. Together Donal and Jacobs find themselves facing a choice ... with the fate of worlds in the balance.
