Project Destiny is the first book in the Biotech Wars series. This can be read as a standalone. There is violence. The author introduces us to an interesting plot line and cast of characters. As usual he has written an exciting SciFi book.

Terraforming on Mars leads to the discovery of old ruins, followed by an alien tech that will change everything. This is only the beginning. Space Station Horus faces a conflict between supersoldiers and hackers. Alice was told that her husband was dead, a month after he went up to space. Now she's formed a team of technical assassins dedicated to taking down New Origins, the corporation in charge of the station, if she doesn't get answers. Someone has to hold them accountable--even if it means going up against an army of genetically engineered super soldiers. Stealth is an elite among elites. This Marine wanted to be on the front line of expansion into space, and now he is. Only the hacker organization known as The Looking Glass stands against them, trying to pull apart all of his team's progress, all they believe in. Neither will stop until they have justice. Jason Bourne meets Mr. Robot on a space station.

Hunted with nowhere to hide. Marick and Alicia have information on Space Station Horus that the leader of New Origins will go to any lengths to stop from being exposed. To get this information into the right hand, they seek out her FBI sister back on Earth. Along the way, they're forced to confront the elite super soldiers known as the Taipans as well as an army of bounty hunters. One thing is certain: with war raging on the streets, they're going to

need all the allies they can find in their desperate fight for survival and humanity's freedom. Jason Bourne meets Mr. Robot in Space.

A gateway to the stars. A colonization mission gone wrong. New powers found in dark corners of space. The Marines hold the fate of our universe in their hands. It was supposed to be a peaceful exploration, Earth's first step in expanding to the stars. But, no plan survives first contact. Thrown into a battle for survival against the deadliest threats imaginable, the Marines must contend with ice and desert planets with mysterious creatures, along with a history of turmoil that threatens to spill over to Earth if not checked. Meanwhile, a genetically-engineered threat rises on Earth—one that holds the secret to this intergalactic war. Will our heroes in space survive long enough to make a difference? Can Earth's forces solve the mystery and put the pieces together in time? They damn well better hurry, or an ancient, long-forgotten enemy will gain an unassailable foothold in their control of the universe and all within. The first book in the Ascension Gate series. Fans of Stargate, Pern, Avengers, and Mass Effect will fall for these heroes in space.

A pirate fantasy & fairy tale retelling for readers who love adventure on the high seas. People who complicate my life earn the business end of my hook. Funny how that never seems to stop them. Think I'm exaggerating? I stand accused of colluding with Fomorian raiders who are abducting young mermaids— And one of the Lost Boys I rescued from Neverland is being terrorized by a Faerie nightmare— A dark menace connects the two things. With the help of my pixie companion, I must solve the mystery while evading the interference of my meddling ex-lover. He's sinfully distracting, but the fun must wait. All those delectable sirens need rescuing. PRAISE FOR THE CAPTAIN HOOK SERIES: "What a great surprise this gem turned out to be!" Goodreads review "A pirate's view of Neverland - it is unique, shedding light on Peter Pan's escapades. Rescues filled with feats of derring-do show the audacity of Captain Hook. She's bold, determined, and has a softer heart than you might imagine for a pirate. Her crew is a fascinating mix of odd characters that you'll love getting to know. The author has a lyrical way of weaving words together that brings each scene to living color. I love it!" Goodreads review "...a great action-packed start to the series!" Goodreads review Fans of the following books and series are known to enjoy this pirate fantasy, fairy tale retellings series: Catacombs by Avery Cross (Academy of Ancients) The Return of the Elves Collection by Bethany Adams Edge of Magic by Jayne Faith (Tara Knightley) Dawnshard by Brandon Sanderson (From the Stormlight Archive) City of Masks by Ashley Capes (The Bone Mask Cycle) Someday My Count Will Come by C. Pish. Pillagin', drinkin', and wenchin' are a pirate's callings, but don't steal from dwarves—they hate the competition. Pirate life aside, all I have ever wanted was a safe place for the Lost Boys I rescued. Ambition may have led me to overstep my bounds. When my theft was discovered, the dwarves launch a devastating sneak attack against my island nation home. This time, I've started a war. What can I say? I regret getting caught. I stand ready to fight for my people, but the odds are grim. Hunting submarines with a sailing ship is a new one even for me. Guess I'll be making this up as I go. Should I fail, those bastards will murder everyone, including the children. Captain Hook

From Africanfuturist luminary Okorafor comes a new science fiction novel of intense action and thoughtful rumination on biotechnology, destiny, and humanity in a near-future Nigeria. Anwuli Okwudili prefers to be called AO. To her, these initials have always stood for Artificial Organism. AO has never really felt...natural, and that's putting it lightly. Her parents spent most of the days before she was born praying for her peaceful passing because even in-utero she was "wrong". But she lived. Then came the car accident years later that disabled her even further. Yet instead of viewing her strange body the way the world views it, as freakish, unnatural, even the work of the devil, AO embraces all that she is: A woman with a ton of major and necessary body augmentations. And then one day she goes to her local market and everything goes wrong. Once on the run, she meets a Fulani herdsman named DNA and the race against time across the deserts of Northern Nigeria begins. In a world where all things are streamed, everyone is watching the "reckoning of the murderess and the terrorist" and the "saga of the wicked woman

and mad man" unfold. This fast-paced, relentless journey of tribe, destiny, body, and the wonderland of technology revels in the fact that the future sometimes isn't so predictable. Expect the unaccepted.

Seven billion people on earth; it was only a matter of time before you discovered the truth. Your legends--your myths and religions--have called us by many names. Since the beginning, our kind has walked among you as your protectors. We are the only ones who know who you are and why you are here. He wasn't meant to disappear; you weren't meant to know why. Our objective was clear: hunt them, kill them and leave. Once you know, there will be no going back. They will come for you. Are you ready?

Science Fiction with a Strong Shot of Romance She's the cadet he couldn't break. He's the instructor she can't forget. Lieutenant Ramie Ashdyn is an anomaly, a person whose genetics makes her stronger and smarter than the average human. She's pledged her life to protect the Coalition, an alliance of thirteen planetary systems, but when a top secret operation turns deadly, she's charged with treason and the brutal executions of her teammates. The Coalition needs the information Ash's team stole on their last mission, so they send in Commander Rhys "Rest in Peace" Rykus to get it. He's the man who's responsible for turning Ash into an elite soldier...and he's a man who isn't, never was, and never will be in love with the woman he trained. Or so he tells himself. Ash wants nothing more than to clear her name and be the woman her former instructor wants her to be, but the enemy who killed her teammates did more than frame her for treason and murder: they telepathically silenced her mind, preventing her from saying anything that might point to the truth about what happened. Now Ash is trapped and set to be executed, the truth dying with her. Unless she can prove her innocence. But taking that path could destroy the Coalition she's sworn to preserve and protect... Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon Sapiens, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

In outer space you can never feel sure that your adversary is altogether human. The runcible buffers on Samarkand have been mysteriously sabotaged, killing many thousands and destroying a terraforming project. Agent Cormac must reach it by ship to begin an investigation. But Cormac has incurred the wrath of a vicious psychopath called Pelter, who is prepared to follow him across the galaxy with a terrifying android in tow. Despite the sub-zero temperature of Samarkand, Cormac discovers signs of life: they are two 'dracomen', alien beasts contrived by an extra-galactic entity calling itself 'Dragon', which is a huge creature consisting of four conjoined spheres of flesh each a kilometre in diameter. Caught between the byzantine wiles of the Dragon and the lethal fury of Pelter, Cormac needs to skip very nimbly indeed to rescue the Samarkand project and protect his own life. Gridlinked is the first sci-fi thriller in Neal Asher's compelling Agent Cormac series.
