A gripping standalone thriller from the “first-rate British crime writer” and internationally bestselling author of the Tom Thorne novels (The Washington Post). Alice Armitage is a police officer. Or she was. Or perhaps she just imagines she was. Whatever the truth is, following a debilitating bout of PTSD, self-medication with drink and drugs, and a psychotic breakdown, Alice is now a long-term patient in an acute psychiatric ward. When one of her fellow patients is murdered, Alice becomes convinced that she has identified the killer and that she can catch them. Ignored by the police, she begins her own investigation. But when her prime suspect becomes the second victim, Alice's life begins to unravel still further as she realizes that she cannot trust anyone, least of all herself. Praise for Mark Billingham and the Tom Thorne novels “Morse, Rebus, and now Thorne. The next superstar detective is already with us?don't miss him.” —Lee Child, author of the Jack Reacher series “Billingham is a world-class writer and Tom Thorne is a wonderful creation. Rush to read these books.” —Karin Slaughter, international bestselling author “With each of his books, Mark Billingham gets better and better. These are stories and characters you don't want to leave.” —Michael Connelly, author of the Harry Bosch series “Mark Billingham has brought a rare and welcome blend of humanity, dimension, and excitement to the genre.” —George Pelecanos, writer and producer of The Wire “Tom Thorne is one of the most credible and engaging heroes in contemporary crime fiction.” —Ian Rankin, author of the Inspector Rebus novels and The Travelling Companion

The Earth is flat, the World Trade Center collapse was a controlled demolition, planes are spraying poison to control the weather, and actors faked the Sandy Hook massacre.... All these claims are bunk: falsehoods, mistakes, and in some cases, outright lies. But many people passionately believe one or more of these conspiracy theories. They consume countless books and videos, join like-minded online communities, try to convert those around them, and even, on occasion, alienate their own friends and family. Why is this, and how can you help people, especially those closest to you, break free from the downward spiral of conspiracy thinking? In *Escaping the Rabbit Hole*, author Mick West shares over a decade's worth of knowledge and experience investigating and debunking false conspiracy theories through his forum, MetaBunk.org, and sets forth a practical guide to helping friends and loved ones recognize these theories for what they really are. Perhaps counter-intuitively, the most successful approaches to helping individuals escape a rabbit hole aren't comprised of simply explaining why they are wrong; rather, West's tried-and-tested approach emphasizes clear communication based on mutual respect, honesty, openness, and patience. West puts his debunking techniques and best practices to the test with four of the most popular false conspiracy theories today (Chemtrails, 9/11 Controlled Demolition, False Flags, and Flat Earth) — providing road maps to help you to understand your friend and help them escape the rabbit hole. These are accompanied by real-life case studies of individuals who, with help, were able to break free from conspiracism. With sections on: the wide spectrum of conspiracy theories avoiding the “shill” label psychological factors and other complications (and concluding with) a look at the future of debunking Mick West has put forth a conclusive, well-researched, practical reference on why people fall down the conspiracy theory rabbit hole and how you can help them escape.

A top neurologist explains the difficulty of diagnosing brain diseases through such cases as a college quarterback who keeps calling the same play and a salesman who continuously drives around a traffic circle.

Enter a wonderland of mesmerizing tales. It's a place that's neither here nor there, where things are never quite as they seem. Inspired by Lewis Carroll's whimsical masterpiece, ranging from the impossible to the mad to the curiouiser, these stories will have you absolutely off your head.

A former girlfriend of Hugh Hefner describes how her years inside the Playboy Mansion went from a fairytale of A-list celebrity parties to an oppressive regime of strict rules, scheduled sex, and a total loss of identity, so much so that she even contemplated suicide.

For the past several years, critics have been describing the present era as both “the end of television” and one of “peak TV,” referring to the unprecedented quality and volume and the waning of old technologies, formats, and habits. Television's projections and reflections have

significantly contributed to who we are individually and culturally. From *Rabbit Ears to the Rabbit Hole: A Life with Television* reveals the reflections of a TV scholar and fan analyzing how her life as a consumer of television has intersected with the cultural and technological evolution of the medium itself. In a narrative bridging television studies, memoir, and comic, literary nonfiction, Kathleen Collins takes readers alongside her from the 1960s through to the present, reminiscing and commiserating about some of what has transpired over the last five decades in the US, in media culture, and in what constitutes a shared cultural history. In a personal, critical, and entertaining meditation on her relationship with TV—as avid consumer and critic—she considers the concept and institution of TV as well as reminiscing about beloved, derided, or completely forgotten content. She describes the shifting role of TV in her life, in a progression that is far from unique, but rather representative of a largely collective experience. It affords a parallel coming of age, that of the author and her coprotagonist, television. By turns playful and serious, wry and poignant, it is a testament to the profound and positive effect TV can have on a life and, by extrapolation, on the culture.

The shocking, never-before-told story of the bizarre world inside the legendary Playboy Mansion—and, finally, the secret truth about the man who holds the key—from one of the few people who truly knows: Hef's former #1 girlfriend and star of *The Girls Next Door*. A spontaneous decision at age twenty-one transformed small-town Oregon girl Holly Sue Cullen into Holly Madison, Hugh Hefner's #1 girlfriend. But like Alice's journey into Wonderland, after Holly plunged down the rabbit hole, what seemed like a fairytale life inside the Playboy Mansion—including A-list celebrity parties and her own #1-rated television show for four years—quickly devolved into an oppressive routine of strict rules, manipulation, and battles with ambitious, backstabbing bunnies. Life inside the notorious Mansion wasn't a dream at all—and quickly became her nightmare. After losing her identity, her sense of self-worth, and her hope for the future, Holly found herself sitting alone in a bathtub contemplating suicide. But instead of ending her life, Holly chose to take charge of it. In this shockingly candid and surprisingly moving memoir, this thoughtful and introspective woman opens up about life inside the Mansion, the drugs, the sex, the abuse, the infamous parties, and her real behind-the-scenes life with Bridget, Kendra, and, of course, Mr. Playboy himself. With great courage, Holly shares the details of her subsequent troubled relationship, landing her own successful television series, and the hard work of healing, including her turn on *Dancing with the Stars*. A cautionary tale and a celebration of personal empowerment, *Down the Rabbit Hole* reminds us of the importance of fighting for our dreams—and finding the life we deserve.

"Tell the doctor where it hurts." It sounds simple enough, unless the problem affects the very organ that produces awareness and generates speech. What is it like to try to heal the body when the mind is under attack? In this book, Dr. Allan Ropper and Brian Burrell take the reader behind the scenes at Harvard Medical School's neurology unit to show how a seasoned diagnostician faces down bizarre, life-altering afflictions. Like Alice in Wonderland, Dr. Ropper inhabits a world where absurdities abound:

- A figure skater whose body has become a ticking time-bomb
- A salesman who drives around and around a traffic rotary, unable to get off
- A college quarterback who can't stop calling the same play
- A child molester who, after falling on the ice, is left with a brain that is very much dead inside a body that is very much alive
- A mother of two young girls, diagnosed with ALS, who has to decide whether a life locked inside her own head is worth living

How does one begin to treat such cases, to counsel people whose lives may be changed forever? How does one train the next generation of clinicians to deal with the moral and medical aspects of brain disease? Dr. Ropper and his colleague answer these questions by taking the reader into a rarified world where lives and minds hang in the balance.
