Sacred Circles - Prehistoric Stone Circles of Wales ...

The classical writers say nothing about stone circles. Instead they say that Druids gathered in sacred groves, caves, or remote valleys. But in the seventeenth century a few scholars began to take interest in the mysterious monuments – the artificial mounds, stone circles, dolmens and standing stones – that filled the countryside around them.

weighing in excess of 40 tons.

Avebury - Crystalinks

It's thought that the stone circle was built in 2900BC to 2600BC built using local Lewisian gneiss rock. Like many of these ancient sites we're still not 100% clear on the use of the circle and whether it was purely ceremonial or for some form of lunar observance which is one theory.

A country walk in Wales often involves an encounter with the past. There are countless prehistoric sites and monuments scattered throughout its beautiful landscapes. Although they are not found in great numbers, there can be little doubt that the stone circles erected by the Neolithic and Bronze Age communities of Wales play a significant part in this rich prehistoric legacy.

Abundant prehistoric remains survive in the wide landscapes of Europe, but none are arguably as fascinating or awe-inspiring as the “megalithic” (after the Greek megas: great, and lithos: stone) monuments built by the people who lived here during the three hugely important periods of European prehistory known respectively as the Neolithic, the Copper Age, and the Bronze Age. These huge, prehistoric stone structures can still be found scattered in their thousands across Europe and provide a tentative but evocative link to their builders, and to Europe’s distant past. From the Mediterranean islands to the colder climes of Scandinavia, *Exploring Megalithic Europe* takes readers to many European countries, examining both famous and lesser-known megalithic monuments and looking at what insights these remarkable reminders of prehistoric life may provide into the ancient communities responsible for their construction.

Having written books on the folklore and myth of water, Varner turns

here to a second ancient element. Focusing on stone in forms ranging from megaliths to hand fetishes, he delves into folklore, early religions, and the continuation of ancient traditions into contemporary society. He also summarizes the archaeological findings on various megalithi

Megalithism, or the art of using huge boulders to create sacred, pagan monuments and sites, still fascinates us today. How did Prehistoric man cut, transport, and place such enormous stones, some weighing up to 200 metric tons, without bulldozers, drills, and cranes? Yet primitive man, without the written word or wheel, created structures which still stupefy us in the 21st century, both due to their components and the precision used in positioning them. This book takes us back in time to the 5th-2nd millennia B.C. and helps us visualise the Stone Age world and its constructions - menhirs, dolmens, rows and circles of standing stones. Undoubtedly they were sacred places, used for pagan rituals and funerary purposes, but the author also gives us details of their astronomic and physical alignment, which clearly demonstrates the knowledge of the heavens these ancestors had and how they applied it without slide-rules, set squares, and theodolites. The high priests of ancient times could calculate when the solstices and equinoxes would occur and thus

Bookmark File PDF Sacred Circles Prehistoric Stone Circles Of Wales

regulate the seasons for sowing and reaping. The author's careful and updated identification of all such structures leads us through 'Ancient European Megalithism' complete with the religious and social aspects of it and its pagan legacies. He does not neglect forms of 'sub-actual' megalithism either - the use of massive stones by peoples described as primitive but with a relatively advanced culture who lived in times closer to our own in Africa, Asia, and South America. The myths and legends arising from the megalithic structures are recounted here in detail; the author also describes megalithic art in the form of statue-stele and menhir statues, as well as the often intricate decoration carved on single stones and in construction such as dolmens, funerary mounds, astronomic observatories, and temples. He also describes studies and experiments on the methods of transport and construction used by Prehistoric peoples, together with conflicting opinions and theories. Amply illustrated with photographs and drawings, Megalithism guides the reader through every part of the megalithic world with smooth-flowing text that will be accessible to specialists and interested general public alike.
