Geography - Geography - Human geography as locational analysis: In human geography, the new approach became known as "locational" or "spatial analysis" or, to some, "spatial science." It focused on spatial organization, and its key concepts were embedded into the functional region—the tributary area of a major node, whether a port, a market town, or a city shopping centre.

Human geography as locational analysis - Britannica

In his book fittingly named "The Spatial Organization of Society" Morrill (1974) provides many inspirations and suggestions regarding location choice, emergence of hierarchies, spatial interactions through which he reaches a complex assessment of the spatial organisation of the regions.

Spatial Organization in International Economics

Spatial organization can be observed when components of an abiotic or biological group are arranged non-randomly in space. Abiotic patterns, such as the ripple formations in sand dunes or the oscillating wave patterns of the Belousov–Zhabotinsky reaction emerge after thousands of particles interact millions of times. On the other hand, individuals in biological groups may be arranged non-randomly due to selfish behavior, dominance interactions, or cooperative behavior. W. D. Hamilton ...

Lesson 13. Spatial organisation of TNCs U6E 24.9.13.notebook

Market areas are an important component of the spatial organization of a region. The above figure considers a simple region composed of three equidistant cities along an axis (1, 2 and 3). On example A, it is assumed that the three cities are of the same size and economic composition, which means that they have the same level of attractiveness or influence.

concepts associated with circulation in its various forms, and they present empirical evidence based on field work from holistic, ecological, social, and economic points of view. Contributions from Latin America, the Caribbean, Africa, Asia and the Pacific come from an international group of authors representing a variety of disciplines in the social sciences. All who are concerned with social and economic development need to recognise the importance of circulation at all levels of society and polity.

Study of Kopaganj Block, Azamgarh District, Uttar Pradesh.

Why do some companies stay out of stock markets? How crucial are stock markets for competition between financial centres? How can local information help investors outperform the market? Whilst mainstream financial economics treats stock markets as consisting of anonymous actors interacting in space, with no consideration of the friction caused by distance or geography, this book offers a comprehensive and up-to-date picture of the global stock market by focusing on the relationships between issuers, investors, and intermediaries, and how these relationships impact on the performance of stock markets

and the economy of cities, countries, and the world. The book uses rich data and global case studies to examine the rise of emerging markets, the impact of the global financial crisis, the revolution in the stock exchange business model, and the continued dominance of London and New York as stock market centres. Drawing on economic geography, financial economics, sociology, history, and globalization studies, the book explores the geographical constitution and footprint of stock markets and contributes to the broader debate on the role of stock markets in the global economy. Its conclusions are relevant to investors, companies issuing stocks, exchanges, analysts, investment banks, and policy-makers.
