“ Note Anytime for VAIO ” is a custom design built enhancing VAIO ’ s outstanding hardware to recognize your writing, cleverly ignoring the pressure of your palm on the touch screen with the digitizer stylus\*. “ Our ‘ Note Anytime' enhances the value of Sony ’ s VAIO, ” says MetaMoJi CEO Kaz Ukigawa.

This easy-to-understand guide helps seniors get started with Windows 7! Many seniors use a home computer to stay connected to family and friends. This fun and friendly guide shows how to use Windows 7, the most popular operating system pre-loaded onto personal computers and laptops, to write e-mails, connect with family via Windows Live Messenger, download pictures with Photo Gallery, and listen to music using Windows Media Player. Windows 7 For Seniors For Dummies uses a large font for the text that makes the book easier to read and it features magnified screen shots to help make the subject matter less intimidating. For Dummies author Mark Justice Hinton walks you through the basics of Windows 7, shows you how to customize the desktop so that it accommodates your needs, and explains how to use the webcam and instant messenger to keep in contact with family and friends. Plus, you'll get critical insight for protecting your personal information. Shows seniors how to stay connected to family and friends using the features of Windows 7 Explains how to use the Internet, send and receive e-mail, upload and download photos, view video, listen to music, play games, use webcam and instant messenger, and more Discusses the important topic of keeping data and personal information safe and secure Uses a larger font for text and includes more than 150 enlarged screen shots For seniors interested in getting started using the exciting features of Windows 7, Windows 7 For Seniors For Dummies is the ideal beginner guide!

The manager of the Sony VAIO personal computer in China has been given two segmentation studies. One study is country-specific and product-specific. The other is a global segmentation study, which covers all regions and all of Sony's many consumer electronics. Which segmentation study should the manager rely on---or is there a way to rely on both? After deciding which study is best, which consumer should the manager target, and with what position? To provide a basis for students (with the help of their lecturer or professor) to answer the following questions: What are the general purposes of a market segmentation study, and what are some of the associated challenges? Is it better for a segmentation study to provide information about the likelihood of category purchase or the likelihood of brand purchase? What are the plusses and minuses of a global versus local segmentation study, and what are the marketing implications of each?

Want to tap the power behind search rankings, product recommendations, social bookmarking, and online matchmaking? This fascinating book demonstrates how you

can build Web 2.0 applications to mine the enormous amount of data created by people on the Internet. With the sophisticated algorithms in this book, you can write smart programs to access interesting datasets from other web sites, collect data from users of your own applications, and analyze and understand the data once you've found it. Programming Collective Intelligence takes you into the world of machine learning and statistics, and explains how to draw conclusions about user experience, marketing, personal tastes, and human behavior in general -- all from information that you and others collect every day. Each algorithm is described clearly and concisely with code that can immediately be used on your web site, blog, Wiki, or specialized application. This book explains: Collaborative filtering techniques that enable online retailers to recommend products or media Methods of clustering to detect groups of similar items in a large dataset Search engine features -- crawlers, indexers, query engines, and the PageRank algorithm Optimization algorithms that search millions of possible solutions to a problem and choose the best one Bayesian filtering, used in spam filters for classifying documents based on word types and other features Using decision trees not only to make predictions, but to model the way decisions are made Predicting numerical values rather than classifications to build price models Support vector machines to match people in online dating sites Non-negative matrix factorization to find the independent features in a dataset Evolving intelligence for problem solving -- how a computer develops its skill by improving its own code the more it plays a game Each chapter includes exercises for extending the algorithms to make them more powerful. Go beyond simple database-backed applications and put the wealth of Internet data to work for you. "Bravo! I cannot think of a better way for a developer to first learn these algorithms and methods, nor can I think of a better way for me (an old AI dog) to reinvigorate my knowledge of the details." -- Dan Russell, Google "Toby's book does a great job of breaking down the complex subject matter of machine-learning algorithms into practical, easy-to-understand examples that can be directly applied to analysis of social interaction across the Web today. If I had this book two years ago, it would have saved precious time going down some fruitless paths." -- Tim Wolters, CTO, Collective Intellect

The importance of viticulture and the winemaking socio-economic sector is acknowledged worldwide. The most renowned winemaking regions show very specific environmental characteristics, where climate usually plays a central role. Considering the strong influence of weather and climatic factors on grapevine yields and berry quality attributes, climate change may indeed significantly impact this crop. Recent trends already point to a pronounced increase in growing season mean temperatures, as well as changes in precipitation regimes, which have been influencing wine typicity across some of the most renowned winemaking regions worldwide. Moreover, several climate scenarios give evidence of enhanced stress conditions for grapevine growth until the end of the century. Although grapevines have high resilience, the clear evidence for significant climate change in the upcoming decades urges adaptation and mitigation measures to be taken by sector stakeholders. To provide hints on the abovementioned issues, we have edited a Special Issue entitled " Viticulture and Winemaking under Climate Change " . Contributions from different fields were considered, including crop and climate modeling, and potential adaptation measures against these threats. The current Special Issue allows for the expansion of scientific knowledge in these particular fields of research, as well as providing a path for future research.

Margaret Bloom's book introduces these irresistible pegdoll craft projects that will inspire all the family.

This book takes a serious historical and international look at the "digital pencil" movement to equip every student with a computing device with wireless connection. Using an ecological perspective as an overarching framework, and drawing on their own studies and available literature that illuminate the issues related to one-to-one computing, the authors present well-reasoned discussions about a set of complex and critical issues facing policy makers, educators, students, parents, and the general public. The Digital Pencil addresses four key questions: Is the digital pencil a good idea? The authors analyze the costs and benefits of one-to-one computing programs through consideration of multiple indicators and examine the evaluation reports of various projects within their analytical framework to present a comprehensive summary of outcomes of one-to-one computing projects. What happens when each child has a networked computer? The authors analyze existing data with the goal of gaining insights and making suggestions and recommendations for policy makers, teachers, and parents. What should schools purchase or lease – is there an ideal device? These authors examine the relative advantages and disadvantages of different devices and implementation schemes. How do we know if one-to-one computing is making a difference? The authors review the evaluation plans of the various projects and propose a framework for comprehensive evaluation and research on one-to-one computing. This book is intended for researchers, school administrators, educational technology professionals, and policy makers in the U.S. and around the world, and as a supplemental text for advanced courses in education, technology, and technological innovation.

Maritime Technology and Engineering 3 is a collection of papers presented at the 3rd International Conference on Maritime Technology and Engineering (MARTECH 2016, Lisbon, Portugal, 4-6 July 2016). The MARTECH Conferences series evolved from biannual national conferences in Portugal, thus reflecting the internationalization of the maritime sector. The keynote lectures and the papers, making up nearly 150 contributions, came from an international group of authors focused on different subjects in a variety of fields: Maritime Transportation, Energy Efficiency, Ships in Ports, Ship Hydrodynamics, Ship Structures, Ship Design, Ship Machinery, Shipyard Technology, Safety & Reliability, Fisheries, Oil & Gas, Marine Environment, Renewable Energy and Coastal Structures. This book will appeal to academics, engineers and professionals interested or involved in these fields.
