Which Europe? offers an authoritative and comprehensive examination of differentiated integration in its functional and its territorial aspects. It focuses on its implications for both the practice and the theory of European integration. Is it strengthening or weakening the EU and its Member States? Are territorial identities being undermined or strengthened? Are new theories of integration required? In particular, this book looks at the relationship between the growth in use of differentiated integration and the widening of European Union membership, the broadening in its

Throughout much of Europe the preoccupation with military security that dominated political thinking after the end of the Second World War has given way to an emphasis upon mutual interdependence. But what does this mean, both theoretically and practically, terms of a `new' agenda? The focus of this book is upon four main issues: * economic development * security * the environment * human rights These are of course not in themselves new issues, but during the period of the Cold War they were subordinated to the ideological division of the continent. Now they have emerged as decisive in the

way in which Europe will develop. The authors examine the four issues in depth, and draw out the links between them. They also examine the various levels at which these problems exist - the level of the 'system', of the state and of the individual. Thus it is possible for them to illustrate general issues with specific reference to local, national and Europe-wide political debates.

How do political authorities build support for themselves and their rule? Doing so is key to accruing power, but it can be a complicated affair. The European Union, as a novel political entity, faces a particularly difficult set of challenges. The Politics of Everyday Europe argues that the legitimation of EU authority rests in part on a transformation in the symbols and practices of everyday life in Europe. The

Single Market and the Euro, the legal category of European Citizen and policies promoting the free movement of people, EU public architecture, arts and popular entertainment, and EU diplomacy and foreign policy all generate symbols and practices that change peoples' day-to-day experiences naturalizing European governance. The modern nation-state has long used similar strategies of nationalism and 'imagined communities' to legitimize its political power. But the EU's cultural infrastructure is unique, as it navigates European national identities with a particularly banality, trying to make the EU seem complementary to, not in competition with, the nation-states. While this cultural legitimation has

successfully underpinned the EU's surprising political development, Europe today is more often met with indifference by its citizens rather than affection. As economic and political crises have stretched European social solidarity to the breaking point, this book offers a clear theoretical framework for understanding how everyday culture matters fundamentally in the political life of the EU, and how the construction of meaning can be a potent power resource-albeit one open to contestation and subversion by the very citizens it calls into being.

enlargement through a post-colonial critique, author Maria Mälksoo makes a convincing case for a rethinking of European identity. Drawing on the theorist Edward Said, she contends that studies of the European Union are marked by a prevailing Orientalism, rarely asking who has traditionally been able to define European identity, and whether this identity should be presented as an historical process rather than a static category. The central argument of this book is that the historical experience of being framed as simultaneously in Europe - and yet not quite in Europe - informs the current self-understandings and security imaginaries of Poland and the Baltic States.
